

Sustainable financing with our ESG Scoring Solution

Our ESG Scoring Solution enables to collect ESG-relevant data
to identify and proactively manage ESG risks.

ESG Scorecards

Corporates

- small firms incl. self-employed
- medium-sized & large companies

Real Estate

- commercial real estate
- residential mortgages

Ships

- commercial maritime shipping

Holistic ESG analysis

Our scoring models, which have been in production since 2022, take an integrated view of all three ESG dimensions – from CO2 emissions to corporate culture and corporate governance.

Early warning & benchmarking

Identify opportunities and risks at an early stage and compare your debtors and portfolios with industry benchmarks.

Data-driven & independent

We aggregate data from reliable sources, validate it and generate transparent, comparable scores.

Modular & API-based

Our solution offers seamless integration with existing systems through APIs and comprehensive reporting.

Regulatory compliance

Support your ESG reporting obligations under the CSRD, Taxonomy and SFDR with consistent, guideline-based data quality.

“Standardised, complete and quality-assured data is essential for assessing ESG risks. Avoid regulatory risks by closing your ESG assessment gaps with CredaRate now.”

Let's talk about your opportunities
